### DETAILED ACTION

1. ***Claim Rejections - 35 USC § 112***The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-12, 21-33 and 35-41 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Applicants fail to teach the fluorenone compound or how to make or use the compound. The halogen (X) is not taught in the specification and there are no working examples of the halogen substitutive fluorenone. The A and B substituted are not taught on any example and the carboxyl fluorenone of claims 2, 14, 22, 26, 36 fail to have the A group if the B group is the carbonyl group.
